Professional Summary

- **Frontend Developer with 4+ years** of experience in **MEAN stack development** specializing in building **scalable, high-performance, and secure web applications**.
- Strong expertise in **Agile methodology**, collaborating with cross-functional teams to deliver **efficient, user-centric solutions** in **fast-paced environments**.
- A **proactive problem solver** with a keen eye for **UI/UX optimization, performance tuning, and deployment automation** to enhance product efficiency.
- Experienced in **streamlining development workflows**, improving **system reliability**, and ensuring **seamless CI/CD pipelines** for continuous delivery.
- Passionate about **bridging the gap between development and operations**, ensuring **efficient deployments, monitoring, and performance optimization**.

Technical Skills

- **Frontend:** Angular (Expert) ,HTML, CSS
- **Backend:** Node Js (Intermediate), Express.js
- **Database:** MongoDB (NoSQL), PostgreSQL
- **UI Libraries & Styling:** Tailwind, Bootstrap, Angular Material
- **APIs & Data Handling:** RESTful APIs, GraphQL, Real-time Data Handling
- **Version Control & Project Management:** Git ,Jira, MS Excel, MS Word, MS PowerPoint
- **Charts & Visualization:** Highcharts.js, Chart.js, PrimeNG Chart, ng2 Chart, Grafana

---

Carrier Timeline

Organization	Role	Duration
Birlasoft	Software Developer	Dec 2020 - Present
Highradius	Product Engineer	July 2019 -Mar 2020

Education

B.Tech in Electronics and Computer Science – KIIT Bhubaneswar *(2016-2020)*

Key Responsibilities (Across Projects)

- **Developed responsive web applications**, ensuring cross-platform compatibility.

- **Engineered real-time dashboards** with RESTful APIs, improving **data accessibility**.

- **Improved data accessibility through custom dashboards & real-time reporting features**.

- **Optimized application performance**, reducing **load time by up to 40%**.

- **Implemented CI/CD pipelines**, automating **deployment & testing workflows**.

- **Collaborated with teams** to design scalable solutions, **enhancing user engagement**.

- **Conducted comprehensive testing & validation to ensure system robustness**.

Projects and Roles

Foresite Edge Device Management

Company: Birlasoft - Weatherford International Project
Role: Software Developer | **Duration:** Aug 2023 - Present
Technology Stack: Angular, HTML5, SCSS, Custom Dashboards, Git, CI/CD Pipelines, RESTful APIs

Manufacturing CognitiveLens Board

Company: Birlasoft - Internal Project
Role: Software Developer | **Duration:** Apr 2022 - Jul 2023
Technology Stack: Angular, Node.js, HTML5, SCSS, ng2 Charts, Azure Cloud, Grafana, Git, RESTful APIs

Digital Manufacturing Insights

Company: Birlasoft - Cummins Project
Role: Software Developer | **Duration:** Mar 2021 - Apr 2022
Technology Stack: Angular, HTML5, SCSS, Highcharts, Azure Cloud, Git, RESTful APIs

AI-Enabled Fintech B2B Cloud Application

Company: Highradius - Internal Product
Role: Data Analyst | **Duration:** Jul 2019 - Mar 2020
Technology Stack: React.js, HTML5, SCSS, NoSQL, GraphQL
